

**AVTECH**

**AVTECH**  
**Management Dashboard**

Information is powerful. Understanding information is, however what truly allows us to lean and adapt to the environment around us. With this in mind AVTECH created its Management Dashboard, a cloud based solution which allows users to get valuable information, displayed in a user friendly way to their desktop, tablet or phone.

When the Management Dashboard is paired with Aventus Nowcast, the system receives a host of information from the FMS which allows managers, decision makers and fuel savings engineer's powerful insights to the operation of their fleet as a whole or an aircraft in particular. Additionally, other outside data sources can be combined to give stakeholders information related to;

- Cost Index
- Fuel usage
- Aircraft weight
- Planned or updated trajectories  
(found and programmed within the FMS)

The service is optimized to be used with other AVTECH products or as a standalone support tool.

## FOR MORE INFORMATION

Contact AVTECH today to schedule a demonstration of the product:
