

Press release 201-07-07

AVTECH draws attention to an informative article about Aventus in Norwegian media.

Norwegian airline has been a customer of AVTECH since December 2018.

AVTECH adapts its services to each aircraft model (B737NG, B737MAX and B787) in the Norwegian fleet. Advanced and customized weather data from AVTECH's unique weather service Aventus is sent to each individual flight, which saves fuel and reduces CO₂ emissions.

Norwegian recently conducted a flight with journalists from the Norwegian magazine "Teknisk Ukeblad" aboard in order to show how Aventus, which is now a fully integrated part of Norwegian's air operations procedures, is used in practice.

The journalistic result after the flight between Oslo and Tromsø is described inter alia. on the newspaper's website in both picture and text.

In the link (in Norwegian)

<https://www.tu.no/articles/avanserte-vardetata-tikker-in-cockpiten-slik-parare-norwegian-pilotene-fuel-br/467813> , the report is shown, including a shorter video sequence from the flight.

As the article in a descriptive way shows how AVTECH's services come to practical use in the Cockpit, it is a pleasure for the board to highlight this in this way.
